

FineReader based OCR module for Captiva InputAccel

Captiva Software Corporation, a standard setter in enterprise input solutions, chose ABBYY Software House OCR technologies for leveraging in its flagship information input solution.

InputAccel[®] Captiva InputAccel is used by hundreds of companies around the world, helping them to collect and integrate external information in their systems. InputAccel works around the globe and the clock to transform the deluge of external data into usable, business-ready content, no matter what its format or point of origin is.

Needless to say that, for a company, accuracy in processing enormous data streams flowing in and out 24/7 is a vital matter and a key criterion when selecting a solution. To ensure the required accuracy, Captiva Software Corporation entrusted creation of an OCR module for InputAccel to ATAPY, ABBYY's software development partner experienced in FineReader-

based solutions for enterprises of various sizes.

Thorough study of InputAccel by specialists from ABBYY resulted in complete project documentation passed to ATAPY for implementation. Besides that, synergetic joint project management (ABBYY+ATAPY) improved the module in terms of usability and productivity in the course of development without running into additional work investment or stretching the project timeline.

Feature highlights

OCR module integrates into InputAccel workflows as configurable instances with user-defined settings. Settings are provided by FineReader Engine and cover pre-OCR optimization, recognition options, and output document formatting. Each instance can be inserted into workflow to envelop from single pages of a document to large volumes of incoming documentation.

CAPTIVA
SOFTWARE CORPORATION

EMC²
where information lives[®]

Captiva Software Corp. manufactures software products for document processing and data capture from paper and electronic documents and provides related services. In 2005 Captiva was acquired by EMC Software Group, a division of EMC Corporation (www.emc.com). This acquisition represented a natural extension to the EMC Documentum enterprise content management platform and added existing integrated technology to the EMC software portfolio.
