EasyData and ATAPY Software: Continued Partnership since 2001

Merging together the exceptional power of ABBYY OCR technology and the experience of ATAPY engineers, EasyData provides Dutch companies with made-to-order yet affordable document management software applications

Among EasyData's customers are such institutions as Amsterdam International Airport Schiphol, the largest Dutch hospital AMC, Dutch Institute of War documentation NIOD, University of Nijmegen, Technical University of Eindhoven, University of Wageningen and others. All those, and many more, have benefited from EasyData's commitment to innovation and excellence. Some of the most notable projects completed with ATAPY participation are described below.

Data Capture Solutions for Logistics Industry

**A cost-effective document management solution
for Van Gend & Loos**

Van Gend & Loos, one of the largest Dutch logistics and cargo companies, turned to EasyData for a solution to automate its document processing through OCR technology. The goal was to extract certain textual and graphical information from an incoming stream of printed forms. Having considered the prohibitive cost of purchasing and operating the full-scale form-processing systems, EasyData and ATAPY offered and implemented a custom solution which works only with the documents received by Van Gend & Loos, but does it better and for a fraction of the cost as compared to any ready-to-use product.

**EasyData and ATAPY help to deliver frozen food
to multinational customers**

Frigolanda is a transport and logistics company specializing in transporting of refrigerated cargo with offices in Belgium, the Netherlands, Germany, and India.

In 2003, EasyData negotiated a contract with Frigolanda under which ATAPY designed a custom export automation module for ABBYY FormReader 6.0. Commercial order forms were fed to a

scanner, and images were automatically read. Then ATAPY's export module received recognized data from FormReader and converted it into custom-format files for further analysis and processing.

In 2004, the customer returned to EasyData with a request for further evolution of the program. The input documents were 2 pages double-sided; sometimes due to scanning mistakes (doublefeeds, face-down feeds) the data was getting mixed up. The new version of the program watched the page order and corrected it when possible, or warned the user of a non-recoverable situation.

Both parts of the project were implemented quickly and to the full satisfaction of the customer. The program is currently working on the customer's site backing up an important part of its business process.

Customizing ABBYY FineReader for processing construction shipping forms in Belgium

The Fernand Georges company (www.georges.be), construction and industrial equipment dealer, was looking for means to automate its document flow processing. The task was to detect specific spots on shipping forms, then read the data at these spots and export it for further processing. In addition, the forms had to be re-grouped into multi-page TIFF files, each file representing one form with its attachments.

EasyData and ATAPY proposed ABBYY FineReader 6.0 Engine as the OCR basis. This choice was additionally justified by the fact that the forms were being prepared with a matrix printer, for which FineReader provides the special recognition mode to increase OCR quality. The solution was successfully implemented and is now participating in heavy-duty production at Fernand Georges.

About Van Gend & Loos:

Van Gend & Loos was a Dutch distribution company. It was established in 1809 by the Antwerp-based innkeeper and carriage driver J.B. van Gend. It was sold to Deutsche Post in 1999. The three daughter companies of Deutsche Post (Danzas, DHL Worldwide Express and Van Gend & Loos) were merged to form DHL in 2003, ending the almost 200-year history of Van Gend & Loos.

About FRIGOLANDA:

FRIGOLANDA (www.frigolanda.com) is a cold logistics group with a storage capacity of more than 75,000 pallet places - 65,000 deep frozen and 10,000 chilled - in Europe divided over 9 offices in the Netherlands, Germany, Belgium and Poland, and a high quality distribution and transport fleet of 65 lorries. FRIGOLANDA drivers deliver to some 1,000 addresses throughout the Benelux, Germany and a growing number of addresses in France, Italy, Great Britain, Switzerland, Austria and Scandinavia every day.
